

PROGRESSING CAVITY SURFACE TRANSFER PUMP SYSTEM

EXTENDS LIFE CYCLE OF ARTIFICIAL LIFT EQUIPMENT

NO NEED TO FLARE GAS AT WELL SITE

PRODUCTION RATE INCREASES BY REDUCING BORE HOLE PRESSURE

EXTENDED PRODUCTION LIFE OF MARGINAL FIELDS

ELIMINATE LOCAL WATER STORAGE, DISPOSAL

HIGHER EFFICIENCIES IN A SMALLER, QUIETER FOOTPRINT

| | |
|--|----------------|
| Maximum fluid temperature (°F/°C) | 212 100 |
| Maximum discharge pressure (psi/kPa) | 1,000 6,895 |
| Maximum volume* (bbl/d/m ³ d) | 5,032 800 |

- Wide production range
- High quality construction
- Lower total cost of operation/ownership
- Easily adjusted
- Easily relocated
- Easy site preparation
- Highly adaptable

*Assuming 100% efficiency and 500rpm
Additional high volume/low pressure pumps up to 3500m³/1200kPa available

'CAUSE WE GIVE A S#!T
